

I understand that the FCC is considering preempting Indiana's current no call laws.

I strongly urge you to re-consider this action. We got on the no call list a year ago and have enjoyed peace in our home once more. We have three different telephone lines coming into our three story home. We would get the same call from the same salesman on each of these lines. We used to get a minimum of 10 calls per day and have to get up and climb a flight of stairs to find it was a salesman trying to change our phone service to ATT or Sprint or MCI or what ever. We have had all of these services at one time or another and would be considered old customers under your new lower standard law. If you change or diminish the higher standard we have with our current state law, you will once again turn our telephone into a necessary nuisance and get me back on blood pressure medicine.
